- Java Programming
- C++ Programming
- C Programming
- Python Programming
- Web development
- Database :SQL
- PHP (Basic)
- JavaScript (Basic)

PROJECTS

- Healvibe Website**
In Hospital Management system it includes registration of patients, storing their details into the database. Our website Healvibe Hospital stores the details of every patient. Only the administrator can add data into the database who confirmed their booking in offline manner.
When the patient confirms the booking, he/she gets a confirmation message to their registered email. To achieve this a database was designed with patient details which the admin can access. The complaints which are given by user will be referred by authorities.
- Number Guessing Game using JAVA**
The fun and easy project "Guess the Number" is a short Java project that allows the user to guess the number generated by the computer.
This allows the user to guess the number generated by the computer and in this the system generates a random number from a given range, say 1 to 100. The user enter their number in a dialogue box.
The computer then tells if the entered number matches the guesses number or it is higher/lower than the generated number.

- **ATM Interface using JAVA**

We have all come across ATMs in our cities and it is built on Java. This complex project consists of five different classes and is a console-based application. When the system starts the user is prompted with user id and user pin. On entering the details successfully, then ATM functionalities are unlocked.

- **Personal Portfolio**

This website completely exhibits my skills and talents owned by me. This project has pleasant colours that suite my choices.

ACHIEVEMENTS & AWARDS

- Awarded with 3rd prize in Spark Your Mind event on Engineers day 2022 at Sri Vasavi Engineering College.
- Awarded with certificate of Excellence for competing in power point presentation on National Mathematics day 2021.
- Awarded with Rs.1500 cash prize and a certificate of excellence for scoring 3rd rank in semester 2 and 5.
- Organised Hackoverflow 2k23, a 24 hours hackathon on behalf of Computer Science and Engineering at Sri Vasavi Engineering College.
- Participated in Hackoverflow, a 24 hour Hackthon conducted at Sri Vasavi Engineering College 2021.
- Participated in one week Workshop on SDG Startup Application Development conducted by Brainovision 2022.
- Participated in 10 days workshop on ReactJs conducted by New Leaf Ins.

CERTIFICATIONS

- Data Science For Engineers certification by NPTEL 2022.
- Cloud Computing course with Elite certification by NPTEL 2023.
- Internship completion certificate by Oasis Infobyte on 3rd January 2023.
- Certified in AWS Academy Cloud Foundations on 27th July 2023.
- Certified in AWS Academy Cloud Architecting 27th July 2023.
